Far Infrared Sauna Therapy

According to "Therapeutic Heat and Cold" by Justus F. Lehmann, MD, heating of muscles produces an increased blood flow level similar to that seen during exercise. Temperature elevation produces an increase in blood flow and dilation directly in capillaries, arterioles and venules.

As the body works to cool itself, there is a substantial increase in heart rate, cardiac output and metabolic rate. Blood flow during whole-body hyperthermia is reported to rise from a normal 5 to 7 quarts per minute to as much as 13 quarts per minute, according to the *Journal of American Medical Association*.

\$15.00 per Session
Package \$50.00 per Month

A Mineral Bath can be included with any service for an additional \$35.
